■ Engaging Tutorials and Presented the topics incredibly well

■ He is very passionate about teaching and knowledgeable about the lecture content!

■ Maxime always brought a positive attitude, and this made his classes incredibly engaging. He also focused on covering what the cohort wanted explained further with enough extra support for students who had individual issues.

■ Maxime is an extremely engaging and knowledgeable tutorial lead. His slides are very clear and effective and stretches our learning in tutorials. The extra MCQ practice in Tutorial 8 was also very helpful in learning solving methods, identifying learning gaps and how to improve. For each tutorial, there could be more instructions on what questions will be covered during which Tutorials as Microeconomics Tutorial questions sheets are quite long and take a long time to understand and solve. Thus, leaving some to self-practice and covering very difficult/insightful ones in Tutorial might be beneficial.

■ Maxime is a very engaging and enthusiastic tutorial lead, he is very receptive to questions and is invested in our learning. He teaches in a way that is easy to follow and breaks down the harder concepts so we can understand them intuitively.

■ Maxime is very engaging, and made it very clear the purpose of what we are learning, and how it builds upon future micro concepts if we chose to study for future electives. Hence it was very clear what is examinable and what content is supportive for our learning.

■ Maxime was very helpful and engaging! He was confident with the material that we covered in lectures and was able to answer all the questions anyone had!

■ My group felt like the feedback for our presentation was not true to what we have actually presented.

■ Na

■ Really engaging tutorial

■ The tutorial lead was incredible

■ The tutorials were clear and engaging, and the tutorial lead delivered the materials very well and in a very clear way.

■ The tutorials were conducted really well and well-designed. Enhanced my learning greatly.

■ Very engaging and responsive. Able to clearly explain both simple and complex concepts and respond to questions

■ Very good - I wish more effort was spent on linking concepts clearly, it's going to be very hard to revise because of the almost scatter approach that was taken - formulas used across exercises always differed, never knew what they were looking for. Lots of time was spent on derivations, which we were told we did not need to learn but then some are required to be able to get the right formulas. The questions themselves made many cultural assumptions and I did not understand the interpretation of the questions.
